

Equisys to showcase electronic document delivery for HIPAA compliance at the InSight 2010 Annual Conference

Zetafax integration with key McKesson products provides secure, fast and cost effective document distribution

Atlanta, GA, USA – 23rd July 2010: Equisys, Inc. today announced it will exhibit at the McKesson Insight 2010 Annual Conference in Denver, Colorado, from the 14th to the 17th of September. Equisys will showcase the integration of its award winning Zetafax software with key McKesson products including McKesson Practice Partners, McKesson LytecMD, McKesson Medisoft and McKesson Paragon.

Simple to install, easy to manage and highly reliable, Zetafax is the proven choice of fax server for over 60,000 customers worldwide. The integration with key McKesson products for the healthcare sector ensures patient information security, while helping organizations reduce costs and increase efficiency.

“Zetafax was our first experience with network faxing and for us it was the BEST choice,” said Dr. Floyd “Tripp” Brad. “We have even put links on our website to show other physicians how to use Zetafax with McKesson’s Electronic Medical Records software package.” Dr. Durrence M.D. also commented: “Zetafax makes it easy to send and receive medical records and charts securely – no more loose paper hanging around, and no more missing charts – making HIPAA compliance a breeze.”

“McKesson’s product range is well respected in the healthcare sector, delivering solutions that enhance the quality of care, increase bottom-line productivity and ensure security of patient information,” said Terry Mayne, General Manager at Equisys, Inc. “The integration of Zetafax into McKesson products builds on these core benefits, reducing costs through decreasing the use of paper and consumables, and increasing efficiency through automating faxing from within the applications themselves. We are delighted to have the opportunity to demonstrate the integration at the Annual Conference.”

Equisys has worked closely with McKesson to ensure the highest levels of integration with its products both today and in the future. To see the integration in action, visit Equisys Inc. in the Product Solution Center (PSD) at the InSight 2010 Annual Conference, Colorado Convention Center, Denver, Colorado. About Equisys

Equisys produces software packages for document production and delivery, including the award winning Zetafax® network fax server and a family of Zetadocs® products that includes Zetadocs for NAV, Zetadocs for GP and Zetadocs PDF.

Our software products are designed for small and mid-market businesses, and for departmental use at multinational companies. They stand out from the competition by being simple to install and manage, reliable and great value – backed by outstanding service and support.

We have over 60,000 customers, in more than 100 countries which are served through an international partner network of distributors, VARs, resellers and ISVs.

Our market leading fax server, Zetafax, speeds the flow of critical business documents by enabling users to send and receive faxes on their PCs. It integrates with ERP, CRM, accounting and other applications for automated faxing from those systems, providing auditable records of fax communications.

Zetadocs helps users work smarter by creating and delivering electronic documents, streamlining business processes to remove tedious manual procedures and help companies improve the service levels they offer. Zetadocs integrates seamlessly with Microsoft Dynamics.

Equisys was founded in 1987 and has offices in London, UK and Atlanta GA, USA.
