

The smart way to manage financial transactions electronically: Zetadocs for Microsoft Dynamics NAV 3.0 is released!

London, UK 15:00 05/11/09

London, UK – Equisys plc, one of the leading developers of software solutions for document management and delivery, and a Microsoft Gold Certified Partner, announced today the launch of Zetadocs for Microsoft Dynamics NAV 3.0.

Version 3.0 is the latest version of Zetadocs for NAV, released by Equisys and certified for Microsoft Dynamics NAV since 2007, which enables smart electronic document management and delivery for NAV. Uniquely, Zetadocs combines the process of automating the electronic creation, delivery and archiving of batches of financial documents, with a set of tools that let NAV users and non-NAV users alike quickly find all documents that relate to a financial transaction.

Zetadocs 3.0 makes it much simpler for NAV users to enable electronic delivery and filing of financial documents. Installation is now so simple, it can be deployed on an NAV test system in a couple of hours. It is also much quicker and easier to send larger batches of documents and multiple users can now process captured documents simultaneously. Other changes include:

- Fileserver archive option - allows the optional use of SharePoint. Companies that don't use SharePoint can archive documents to shared folders on their fileserver instead.
- Silent client - enables batches of documents to be sent in the background without interruption.
- Wider version support - compatibility with Navision 3.60, and 3.70 in addition to NAV 4.0, 5.0, 2009.

“In times where every business is facing increasing costs and a requirement to be ever more efficient,” said Chris Oswald, CEO of Equisys, “Zetadocs can add real business value by removing a substantial proportion of the costs most businesses allocate to managing their financial transactions. From automating the process of invoicing through to managing collections, Zetadocs takes away the need for paper and in a few mouse clicks makes documents available to authorized employees, customers and partners that need to see them.”

“And return on investment is still very important. Zetadocs for NAV capitalizes on customers’ investment in Microsoft Dynamics and other Microsoft technologies, including SharePoint, Windows Workflow Foundation, and Microsoft Office. By eliminating the mountains of paper within their offices, many of our customers see an ROI in a few months.”

About Zetadocs for Microsoft Dynamics NAV and GP

Zetadocs for NAV was launched in October 2007 to enhance Microsoft Dynamics NAV by enabling users to reduce the dependency on paper in their finance processes by switching to electronic document production, delivery and management. Its sister product Zetadocs for GP was launched in October 2008.

Zetadocs core module, available for both NAV and GP, makes it easy for finance departments using those products to automate the electronic delivery, archive and retrieval of financial documents. Reports such as purchase orders and invoices are emailed straight from the ERP system using Zetadocs. Copies are automatically indexed and archived to a SharePoint server.

Zetadocs is a modular document management system. Our Advanced Solution Partners can extend Zetadocs to support document capture for on screen reference and approval. Having all key financial documents immediately to hand improves customer service, reduces filing costs and can help ensure regulatory compliance.

About Equisys

Equisys produces software packages for document production and delivery, including the award winning Zetafax® network fax server and a family of Zetadocs products that includes Zetadocs for NAV and Zetadocs PDF.

Our software products are designed for small and mid-market businesses, and for departmental use at multinational companies. They stand out from the competition by being simple to install and manage, reliable and great value - backed by outstanding service and support.

We have over 60,000 customers, in more than 100 countries which are served through an international partner network of distributors, VARs, resellers and ISVs.

Our market leading fax server, Zetafax, speeds the flow of critical business documents by enabling users to send and receive faxes on their PCs. It integrates with ERP, CRM, accounting and other applications for automated faxing from those systems, providing auditable records of fax communications.

Zetadocs helps users work smarter by creating and delivering electronic documents, streamlining business processes to remove tedious manual procedures and help companies improve the service levels they offer. Equisys was founded in 1987 and has offices in London, UK and Atlanta GA, USA.
